Career Goal: Instructional Designer

Accomplished Instructional Designer who excels at creating the best solutions for learning goals, large or small. Solutions start from my deep and broad base of technical skills, with a passion for developing E-Learning, but the best solutions go beyond technology. They depend on people. My teaching experience allows me to clearly communicate with SMEs, teachers, and learners. My technical experience allows me to communicate with server administrators, computer programmers, and technology vendors. Combining all my experience allows me to bring all stakeholders together to create, implement, and improve solutions.

Work samples are at <http://stevens-portfolio.com>.
